MANURE SPREADER TRAILERS WITH 2 OR 3 AXLES

Gross capacity from 14 to 20 tons

THE “HISTORY” OF PUPIN FAMILY

WAS FOUNDED IN ROMANS IN 1780 AND HAS RECEIVED A GOLD MEDAL FROM THE ITALIAN TRADE UNION FOR ITS UNINTERRUPTED ACTIVITY SINCE THEN.

The Pupin family coming from Cavazzo Carnico arrived in Romans around the middle of 1700 with Michele Pupin who was smith. Here he founded the business together with his son Antonio Pupin. During the Napoleonic wars Antonio went to Piedmont but was back again in Romans by 1814 directing the handicraft factory. Since then many generations of Pupins have followed him in this trade, developing more and more professionalism. Giuseppe, the son of Antonio, and his son Pietro, called Master Pierin, worked on orders from Austria and Italy. Their customers were the farmers who bought the simple agricultural wagon but also the wealthy people who ordered carriages. In 1912 the production of the friulian carriage which they built exclusively, won them the first prize at the agricultural fairs in Udine and Trieste. This carriage cost about 130 korons. They did not only do serial production but worked also on orders which required special skills. At the end of the thirties when cars and tractors conquered the markets they stopped the production of the simple wagons and started with the construction of the first wagons with tyres. In 1959 the knight Venturo, the son of Augusto, started with the production of the first trailers for use with tractors. Today the company is situated in the industrial area of Romans, directed by Mr. Sergio Pupin, son of knight Venturo, who now uses advanced technologies to meet the growing demands of agricultural transport. Now there is another Michele who is the son of Sergio Pupin. He works together with his father in the company and will be adding the latest technical know-how resulting from his studies to the long tradition of his family.
